## First Network Programming Homework

### Question 1: Python Basics?

A-Define a list that contain the names of graduated students” 5 students at least”:

Create a program that accept student name and prints if the user is graduated or not.

```
homewok1 a.py - C:/Users/NewTech/Desktop/homewok1 a.py (3.7.2)
File Edit Format Run Options Window Help
my_list = ["Nada","Halla","Rahaf","Ali","Hassan"]
name=input("Enter your name: ")
i=0
for my_list[i] in my_list:
    if name==my_list[i]:
        print("the user is graduated")
        break
    else:
        print("the user is not graduated")
    i=i+1

إنشاء القاموس: العدد\*العدد نفسه على المجال من 1 إلى 10 .

## Question 2: Convert from decimal to binary

Write a Python program that **converts a decimal number into its equivalent binary number**.

The program should start reading the decimal number from the user. Then the binary equivalent number must be calculated. Finally, the program must display the equivalent binary number on the screen.

**Tips:** use empty list to hold binary number, use loop, use % operator, use // operator, use list append method, reverse the list.

تم إجراء العمليات الحسابية لتحويل الرقم العشري إلى ثنائي وباقي قسمة العدد العشري على 2 تعبر عن العدد الثنائي الذي تم الاحتفاظ به بالقائمة الفارغة التي تم تعريفها بدايةً.

وتمت طباعة النتيجة عن طريق استدعاء التابع format() الذي يأخذ قيمتي الرقم الثنائي والعشري

والتابع append() الذي يضيف القيمة المدخلة له إلى القائمة والتابع reverse() يقوم بعكس القيمة الموجودة في القائمة.

## Notes

- Homework is accepted as **well explained Pdf & “Nicely Formatted Code”** "You can do all job in one notebook then print as pdf or “copy and paste” on word document “use” then convert into pdf with extra info "
- You have to show:
  - Question number >> Question itself >> your answer code with explanations > your Result “you can use this doc as template”
- You Have to Show code execution as Screenshots from your laptop or phone”.
- Apply your full name and number, Homework number to pdf.
- Similar Solutions will **rejected** and not accepted.
- The Homework is accepted until the date of "12/5/2022", if after >> mark=mark- (current\_date -12/5/2022)\*0.3
- An Extra Marks if you upload your code to your **GitHub Account**, “PDF + Code”

```
target_words = set()

with codecs.open(path, 'r', encoding='utf-8') as f:
    lines = f.read().split('\n')

    for l, line in enumerate(lines[0:len(lines)-4]):
        print(l, '>>>', line)
        if line.isdigit():
            print(lines[l])
            mylist = [lines[l], lines[l+1], lines[l+2], lines[l+3], '\n']
            all_texts.append(mylist)
            print(mylist)
            print('*****')

try:
    os.mkdir('out', 0o666)
except OSError as error:
